The screenshot displays the DSpace/Manakin Repository interface. At the top, a blue header bar contains the text "DSpace/Manakin Repository" and a user profile link "Profile: Bram Luyten | Logout". Below the header, a breadcrumb trail reads "DSpace Home → Molecular Genetics Section → Laboratory of Neuronal Communication → View Item".

The main content area features the title "Mitochondria at the synapse" in a large, bold font. Below the title is a link "Show full item record". The item's metadata is listed: "Title: Mitochondria at the synapse", "Author: Verstrecken, Patrik", and "Abstract: Synapses are packed with mitochondria, complex organelles with roles in energy metabolism, cell signaling, and calcium homeostasis. However, the precise mechanisms by which mitochondria influence neurotransmission remain undefined. In this review, the authors discuss pharmacological and genetic analyses of synaptic mitochondrial function, focusing on their role in Ca2+ buffering and ATP production. Additionally, they will summarize recent data that implicate synaptic mitochondria in the regulation of neurotransmitter release during intense neuronal activity and link these findings to the pathogenesis of neurodegenerative diseases that feature disrupted synaptic mitochondria, including amyotrophic lateral sclerosis and hereditary spastic paraplegia." Below the abstract, the URI is given as "http://demo.dspace.org/jspui/handle/123456789/59" and the date as "2006-08".

A section titled "Files in this item" contains a table with columns "Files", "Size", "Format", and "View". The table lists a file "DPS0806.pdf" with a size of "118.1Kb", format of "application/pdf", and a "View/Open" link. Imageplugin extracts very limited metadata so image file collections have to manually add metadata. The PDFboxplugin extracts a lot of metadata BUT it is not working!

The screenshot shows the ImagePlugin application window. On the left, a 'Collection' pane lists several image files, with 'A Case of Identity.jpg' selected. On the right, a table displays the metadata for the selected file. The table has two columns: 'Element' and 'Value'. The metadata includes Dublin Core (dc) elements like Title, Creator, and Description, as well as ImagePlugin (ex) specific elements like FileFormat, ImageSize, and ImageType.
